I am a detail-oriented and demanding to yourself Fullstack Developer who enjoys learning new skills and troubleshooting complex problems. After success in Vue.js development, I want to improve my team managing and back-end developing skills. Always focused on goals and code style.

## Skills

### Languages

- CSS/Sass
- Html
- JavaScript
- Python
- SQL

### Frameworks

- Vue.js
- Nuxt.js
- Node.js
- Flask
- FastAPI
- aiogram

### Libraries

- Vuetify
- Vuex

### Databases

- MongoDB
- MySQL
- PostgreSQL
- Firebase

### CI/CD

- Git

## Projects

### NotesAPP [\[Github\]](#) [\[API\]](#)

Nuxt.js, Fastify, MongoDB  
Clone of Notion

March 2022

### Moonlist [\[Webarchive\]](#)

Nuxt.js, FastAPI, PostgreSQL, Discord.py, Mkdocs

It's a discord bots monitoring. The project consists of 4 modules: Moonlist Brain(Discord bot), Moonlist Brain(Website for bot), Moonlist API, Moonlist

February 2021 - October 2021 (~7 months)

## Experience

### Hypefood [\[Website\]](#)

FastAPI, Docker, RabbitMQ, Redis, PostgreSQL, aiogram

It's a big online food delivery website. Used many technologies and apis, such as: liqpay, checkbox, iiko, omnicell, kyivstar. Solved a lot of problems with pushing online updates, caching and customers realibity system. In this project I worked only at the backend part and telegram bot.

December 2022 - May 2024
